Profile Summary

- Junior Full-Stack Developer with DAM (Multi-platform Applications Development) training.
- Native fluency: English, Portuguese, and Spanish.
- Real-world experience in the tech sector collaborating on microservices containerization, infrastructure optimization, and data analytics.
- Proven ability to identify and resolve critical performance and consistency bugs, working with total fluency in both native Windows environments and Linux servers.

Certifications

Baccalaureate 2025
Colegio Palma
<https://www.colegiopalmalacanyada.es/>

Education

IES Henri Matisse 2º • DAM

Technical Skills

- **Programming Languages:** Java, JavaScript, Python, C, HTML5, CSS3.
- **Frameworks & Libraries:** React.
- **Databases:** Oracle PL/SQL, MySQL, MariaDB.
- **DevOps, Cloud & Monitoring Tools:** Docker / Docker Compose, Grafana, Railway, GitHub.
- **Operating Systems:** Native Windows environments (PowerShell / CMD) and advanced Linux server administration.

Work Experience

ANNEA.AI in collaboration with EOLOTEC Portugal
Intern 40 days

- **Infrastructure Optimization:** Redesigned and optimized container configurations using Docker Compose, achieving a 27.6% increase in efficiency and deployment times for the local environment.
- **Database Refactoring:** Restructured the application's database schema to improve performance and storage cleanliness.
- **Critical Bug Resolution:** Diagnosed and resolved a production concurrency issue that was creating duplicate records in the tables.
- **Stack used:** Python, JavaScript, Docker, MariaDB, Grafana, Slack.
